PROFILE OVERVIEW

RELEVANT EXPERIENCE

Professional Experience:

Seasoned supply chain leader with strong experience in demand planning, import operations and inventory optimization. Proven track record in delivering cost savings and revenue growth through **Demand Planning, Data Warehousing, ETL, Databricks, Power BI** and **SAP**-based analytics and automation.

Professional Education

Bachelor’s of Science Mechanical Engineering

Languages

Spanish C2
German C2
English C1

Demand Planner Manager

- Managed operation strategy and daily production scheduling with plant and **Brand Managers**, driving a 5 percentage-point revenue increase in 8 months utilizing advanced forecasting techniques with **Python, KNIME & SQL**.
- Designed **Databricks ETL pipelines** and automated allocation with **Power BI**, reducing inter-plant transport costs by \$50,000/month.
- Coordinated **ETL** workflows for production prioritization and container offloading using **Excel** and **Python**, achieving 60 DOH safety stock and 0 USD NPI.
- Built Databricks dashboards, Azure pipelines and scripts to automate reporting tasks saving 100 FTE hours

FP & RPM — Finished & Raw Product Analytics Manager

- Owned **E2E** imports for Argentina, leading a 4-person team and co-facilitating **PDCA** reviews to track logistics and production performance.
- Orchestrated Just-In-Time inbound flows through daily alignment with regional and national planners/buyers, cutting lead time by 5 days.
- Built reporting methodologies with **Excel, Power Automate, SAP**, and **Power BI** to identify extra costs and deliver monthly savings: \$40,000 container lay-time, \$25,000 customs.

Customer Team Logistics Analyst

- Drove continuous improvement of plant/DC maintenance events using **KNIME** and **Power BI** to visualize **KPIs** and detect out-of-target issues.
- Managed **SAP** purchase order data extraction with **Excel, Knime**, and **Python** to produce Power BI reports that raised on-shelf availability from 82% to 90%+ and cut Cost-to-Serve by 15%.
- Developed **ETL** solutions and a quality logistics procedure for high-volume and hazardous materials shipments while coordinating cross-functional stakeholders to navigate import constraints.
