INDUSTRY EXPERIENCE

- Financial Services
- Oil & Gas
- Software platforms
- Chemicals
- Industrial

FUNCTIONAL EXPERIENCE

- Data Engineering and Integration
- Big Data Quality Management
- Data Analysis and Reporting

CERTIFICATIONS/TRAINING

- AWS Cloud Practitioner
- SQL
- Snowflake
- Azure DP 900 (in progress)
- Power BI
- Python
- Microsoft SSIS

PROFILE OVERVIEW

Professional Experience

Experienced in **data engineering**, **big data** service management, and **data warehouse** analysis. Skilled in **data analysis**, **ingestion** and **quality control** using tools like AWS, Snowflake, SQL, and Airflow. Proven ability to resolve data quality issues, perform root cause analysis, and present impactful executive reports. Adept at collaborating with teams to **optimize data processes** and ensure operational efficiency across various platforms.

Professional Certifications & Education:

Bachelor Degree in Industrial Engineering

Languages:

Spanish (Native)
English (C1)

RELEVANT EXPERIENCE

Software Engineer Platform – Software platforms

- Design and implement **data models** on SAP BTP, using CAP framework, enabling structured backend data services for enterprise applications.
- Develop and maintain backend data services to support analytics and reporting processes, implementing business logic, ensuring **data integrity** and reliable insights.

Data Engineer, Quality – Financial Services

- Resolved **data quality issues** with ingested data in AWS data lake.
- Performed **root cause analysis** using **AWS** (S3, Athena, EMR, DynamoDB, CloudWatch), **Snowflake** and the **Matillion** ETL platform.
- Improved integrity quality rules in **OvalEdge** using **SQL**, affecting 10% of the issues reported.
- Delivered **Power BI** reports about data quality issues to analyze and improve internal team's operations.
- Supported new team members to understand data workflows, tools, and data quality processes, accelerating their onboarding and integration into the team.

Data Engineer – Financial Services

- Developed an end-to-end data pipeline to ingest data from Qualtrics into **AWS data lake** (S3, Athena, EMR, DynamoDB) and load it into **Snowflake**, using **Python**, **SQL** and **GitLab**, and orchestrating workflows with **Airflow**.
- Transformed raw data into analytics-ready datasets using SQL and Snowflake data warehouse, resolving 40% of data quality issues.
- Developed an ELT process in the **Matillion** platform to support Customer Experience stakeholders needs.

Data Warehouse Analyst – Oil & Gas

- Monitored and analyzed **ETL processes** in **SSIS** and performed **SQL analysis** to identify performance bottlenecks, anomalies and inefficiencies in data pipelines.
- Delivered a **Power BI** report to assess data warehouse performance and uncover optimization opportunities, reducing failures due to packages dependencies by 15%.

Data Analyst – Chemicals

- Implemented ETL process to clean and transform data using **Python** and **SQL Server**, increasing total database records by 60% through integration of new data resources.
- Contributed to data migration from CSV and Excel files into **Google Cloud Platform**, using **BigQuery** and **Cloud Storage**, for dashboard development project.

Supply Chain Analyst - Industrial

- Analyzed inventory and production data using SAP PP/MM and advanced Excel to support supply chain planning and performance tracking.
- Collaborated with Production and Sales teams to deliver interactive reports using Power BI and Excel visualizations for operational decisions.
